DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Objections

2. Claims 1 and 28 are objected to because of the following informalities: Claim 1, line 5 – replace “potable” with “portable”. Claim 28 insert a period at the end of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 27 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,151,355 to Vallee et al.

As concerns claim 27, a host processor (column 2, line 40); a modem unit (figure 1) configured to receive an external status check request (abstract) from an external computer (abstract; computer sending remote commands) over a communications network, and to reply (abstract; column 5, lines 6-22) with modem status information in response to the request without being controlled by the host processor (abstract).

As concerns claim 28, a modem status memory (column 2, line 59).
